# **READ BEFORE INSTALLING!**

#### **Diagnostic Indicator Meanings:**

CPU/COM: On solid when board is powered -- Flashes rapidly when exercising CLOCK: Flashes when load voltage is present at the board BATT CHARGE: Cycles on and off with the battery charger. 20 minutes on/20 minutes off UTILITY LOSS: On solid when utility sensing is lost LOP/HET: On solid when LOP or HET fault is triggered OVER SPEED: Over speed fault indicator OVER CRANK: Over crank fault indicator COMMON FAULT: Common fault indicator

### Programming the Exerciser:

You can use the external Set Exercise Time switch just like the original. Using the external exercise switch will set the exercise timer for the current day and time.

You can advance the exercise day with our replacement control by holding the on-board "SET EXER" button. The weekly cycle is represented by 7 LEDs (numbered on the board).

Example #1: You would like to set exercise for Friday and it is currently Monday -- Hold the "SET EXER" button until LEDs 1 through 4 light up. The exercise timer will now go off in 3 days. Example #2: You would like to set exercise for Tuesday and it is currently Wednesday -- Hold the "SET EXER" button until LED 1 lights. The exercise timer will now go off in six days.

To view the current day in the exercise timer, press the on-board "SET EXER" button. Each illuminated LED represents a day (24 hours) that has already passed. The amount of time left on the exercise timer is represented by the number of LEDs that are off.

Example: You press the "SET EXER" button and LEDs 1 and 2 illuminate --There are 5 days left until the exercise timer goes off.

#### Test Transfer Button:

While in Manual mode, you can transfer the load by using the on-board "TEST XFER" button. Press it once, the load will transfer. Press it again to retransfer.

#### **WARRANTY POLICY** Replacement Generator Controls Manufactured by FLIGHT SYSTEMS

#### Replacement Generator Controls Manufactured by FLIGHI SYSTEM:

Note: Always Refer to the Specific Generator Set Manual when Troubleshooting Problems.

This Flight Systems manufactured replacement generator control is warranted to be free from defects in materials and workmanship for a period of two years from the date it was sold. *(This date appears on unit label)* 

Flight Systems' Limited Warranty covers the repair or replacement of defective product within the warranty period. It does not cover the cost of installation, or removal costs incurred, or possible damage to other equipment (including the generator or parts thereof) as a result of this product.

Flight Systems (or its authorized agent) shall reserve the right to determine the cause of malfunction. In the case if we determine that it was due to abuse, misuse, improper installation, acts of nature (such as storms), failure to perform recommended gen set maintenance procedure or problems elsewhere in the gen set, the warranty claim shall be disallowed and established repair rates shall apply. Ship defective units directly to:

Flight Systems, 207 Hempt Rd. Mechanicsburg, PA 17050 - Attention: Warranty Repair Please prepay all freight charges and note the nature of the failure, if known.

**Return Policy:** Unwanted items <u>may only be returned within 30 days of original purchase date</u>. Refund/credit issued shall be less a 25% per item restocking/re-test fee as long as unit is in new, undamaged condition. Shipping charges are not refundable.

### **REBUILDING SERVICE**

If this product suffers a failure when out of warranty, it can be rebuilt. As with all Generator Controls Rebuilt by Flight Systems, a One-Year Warranty will be issued. Please contact us for current rebuild pricing. *Ship units to:* 

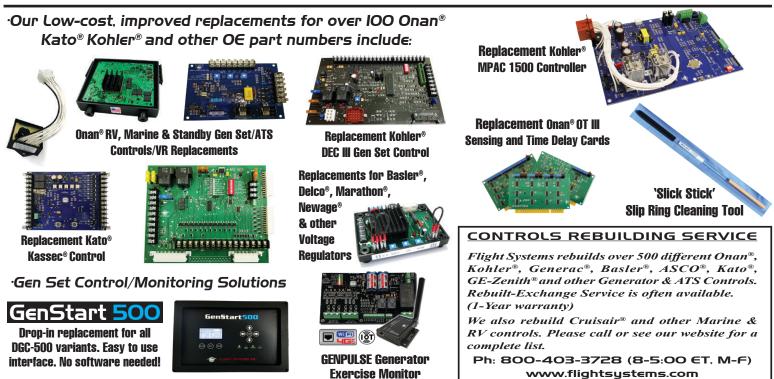

Flight Systems, 207 Hempt Rd. Mechanicsburg, PA 17050 - Attn. Repair Dept.

Please prepay all freight charges and note the nature of the failure, if known.
